LAD'ES AND GENTLYMEN :- Agreeable to the kind invitaan of the Trustees of Oakley, I come here to redeem my omise to address you with whatever ability I possess. My adment to the cause of learning, and my zeal for the ass of Oakley forbid that I should decline. My purpose is not to please the fancy by dwelling in the and imaginary, or to win the attention and satisfy the by any attempt at eloquence; but simply and plainly throw out a few hints on the influence and necessity of ation, to warn you school boys and girls against the many some friendly advice in the way of procuring for yourlyes an education, drawn from experience, that unerring and best of teachers. I do not profess to have made the aper use of advantages which I have had, but I can better

we wherein I have erred, and warn you against falling into With most of young people schools are considered merely applaces of cruel confinement and punishment; you say to ourselves, when you approach a difficult lesson, or enter upo a new study, that you don't see any use of acquiring this, his will never be of any use to me, I can live quiet and easy eithout knowing this, and why trouble and vex myself with Beware, my young friends, of the tempter. These are suggestions of Sloth, the most artful, persuasive and langerous of deceivers. Close your ears against her imortunities; nerve your arm to resist her subtilties, for, be sure if you become a dupe to her sophistries, or suffer her deadening influence to get the advantage of you, the day will come when you will grieve over your weakness; when you will regret y ur lost opportunities and wasted time -Each one of you has been told a thousand times over by ar leachers and parents that schooling is intended solely our own benefit, and that education is the richest legaman can bequeath to his heirs. Do you believe that would tell you a lie? Do you believe that your parents idgo to the trouble and expense of sending you to

and then tell you a lie to induce you to accept of their est offering? No! you do not believe this, it is impossithat you should. Ask yourselves in candor for whom ducation is intended; the plainest answer of all the and is, for yourself, for who can use it, who can take antage of it but yourselves; it is absolutely yours, at own disposal, to use as you choose. You cannot realany pecuniary benefit while obtaining an education, as gan by serving apprentice at any trace, such as carpenof smith, or the like; but you can realize an inward satisgon and approbation, to which none but the experienced bear witness. Every scholar in the sound of my voice as left a thrilling pride and over-sufficient satisfaction after wine solved a problem which required long hours of in longht and close application; every bosom has beat and honest elation after having recited with suc moult lesson. Besides this, when you shall have your education and enter into the great battle of d, the vantage-ground which you will be able to ascome well richly reward you for your time and expense; it notices not to what you turn your attention in after years, decipline will show itself in giant form and glowing Many young people deceive themselves as to the of early study, they allow themselves to fall into the region, that edication and early intellectual culture accomulation of a great many facts, however terminate and unsystematic, and set themselves eneral reading so as to arrive at the accumulation of before the mind is prepared to go through the reaming by which facts and conclusions are forced upon the ming; many times they read an argument until they the conclusion, quickly embrace the conclusion without fully understanding the argument; this is the way by which so many faltacies are forced upon the people by smaggares and public thinkers. This is not, in the least, ect of early study, but on the other hand, its object ato train the mind, to give the reasoning faculties exercise, a strengthen the memory and to invigorate and enlarge the ental capacity; you may study for weeks over the probeas of difficult mathematics, you may labor long over the motion of a phrase or to imbibe the elements of lanwithout arriving at a single practical fact, or seeing

early the object at which you aim; but when you lave gone through, step by step, the mental process, an faculties are brighter, and you are prepared to go bugh more severe exercise with less labor and exertion, til you are calculated to review with care and pleasure difficult mathematics, and to unravel the most com sheated metaphysics. When this point is arrived at, you are prepared to enter into any study, and pursue it with suc ess and lamiliarity. The object, then, of mental training is to prepare you to enter into the more acive pursuits of life, not to learn you facts, but to prepare ou to learn facts for yourselves, without the aid of an inructor, and to arrive at conclusions safely by the exercise Many greyheaded and dignified old farmers have and, that it is unnecessary for a farmer to be an educated mand that he can plow his corn, hoe his cotton or guber cas "athout the aid of Pierce, Oimsted, Casar or Virgit; so emay do it as well as did his forefathers, but I have no patience with this species of Old Fogyism; you may the tact and customs of your ancestors for a standard, and worry through a whole life of toil and disappointments. without the faintest hope of improving your own or your neighbor's condition; without throwing into the scales a smale thought to turn the tide, and give momentum to civil-The object of life is to advance; the watchword of erprise is to advance; the zealous hopes of the philanst is to advance; the command of God is to advance improve the moral nature and intellectual condition of dental training awakes the sleeping energies of the ad; a quickens and puts the senses on the alert to catch and embrace every opportunity to improve; it sets man the way of thinking-of concentrating and directing the whole power of his mind to one particular object, and qualhes him to dissect every part of his subject and examine it with accuracy :—let that subject be what it may, it enables ann opplace his labors so as to arrive at the greatest possiin short, and the every-day occurrences of common life, as well as the extraordinary emergencies of states and nations, edcallot will guide and advise you for the best. It is the qualest and truest friend that you can possess-always rady in prosperity and adversity, to check your overweaning plate, buey up your depressed spirits. It is a microscope the mental eye, by enlarging the apparent field of visin the ambles you to see the minutize of your subject, and Manufe it with the most accurate precision. Thousands of life but important things may be detected and explained, which the unmided mind would never discern. The more the hand is trained and exercised in the various studies that are calculated to enlarge the understanding, the more magnifybg will be the microscope, and the more easily and acculately will you be enabled to unravel the mysteries of sophally and the manners of circumvention and imposition, leavghare and unmistified the plain and naked truth. It you

Jourselves to flag, or be deceived when the poet tells "A little learning is a dangerous thing,

Wathout venturing to deny the fitness of these lines for be a general rule; they are only an exception to the gen-These lines are calculated to deceive the cursowho are made fools by a little learning. But this class are aceptions, and are generally incapable of ever learning mough to discern their own deficiency. I would advise and esech all, then, if their opportunities are not as great as his praise will be due you, and you will receive it from every | triumph.

After you have obtained an education, be it little or much, with as you see fit, no conveyance under Heaven can or for evil; a non-use of it will implicate you in the sight of _ John Shepard, Esq., Post Master. God, so will equally a mis-user of it bring down upon you the wrath and displeasure of the Most High. If the Poet had said that: learning is a dangerous thing unless attended With a due sense of moral obligation, it strikes me that he would have laid down a correct and unwavering rule; edu-Cation is indeed dangerous when used to forward some mean design, or to advance some ignoble undertaking, when the cultivated mind is so blackened and polluted by vice and inlemperance, as to blind the moral eye against all the entreaties of self-sacrificing philanthropists, to render the ear deaf and beedless to the loud and cloquent appeals of the Evangerist, and the soul unmoved by the spectacle of the cracifixion as d resurrection of the Savior of mankind. An concated man, without a due sense of moral duty, is like a Perfect ship at sea, with the exception of a rudder, always hable to be drifted by adverse tides, and enveloped in the whitipool, or dashed to pieces against some dangerous cape, without the power in the heart of changing its course or and erading the disaster; so the man is ever liable to be carried astray by eve y tide of erroneous public opinion, and the Fly entreaties of Satan, into the whiripool of excess and fligacy, until at last he is landed a wreck in hell. You are under obligation to use your education, be it little or some way acceptable to God; therefore, that dealee of moral training which enables us to discern our relah to our God, to our fellow man, and to all things with which we come in contact, should be strictly attended to and rigidly carried out, when we come to look into the wide, world of vice and wickedness, seeking a calling to which we are to apply the strength of our mental attain-

We are not put in this world to waste away our precious the and dissipate our senses in wanton riot and inglorious tase with appetites always gratified and never sickened with life ever fresh and joys ever new-with no ill-forcune, all prosperous and flourishing. Your own good conscience, if it has been trained by the lessons of Eternal Wisdom and Truth, will tell you that there is something wrong out this mode of thinking-that there is something dready amiss about this kind of life could it ever be realized; and, on the other hand it will tell you that you have a task Matches, Salt, Vinegar, Oil, &c. perform; and, if it is not completely finished, you are to answer for every default. He who placed you here gave to you the light of reason to search out that task from the vais labors of man and the peculiar circumstances of socieinto which you may be cast. Every human being who is Growers in the country. For sale by dowed with common sense and physical ability must abor, for without it there is no excellence, without it there is neither mental or physical vigor, cheerfulness or anima-

tion. You must labor or sink a hopeless prey to the tempter, for without some honest pursuit to engage the attention, sickened idleness and ennui will seek to be relieved by resorting to the gambling saloen, the drunkard's bottle, and all the debasing and distracting agitations of vice.

Vast happiness enjoy thy gay allies; A youth of follies, an old age of cares; oung yet enervate, old yet never wise Vice wastes their frames and their mind impairs. Vain, idle, dissolute, in thoughtless care, Reserving woes for age, their prime they spend; All wretched, hopeless, to the evil days, With sorrow to the verge of life they tend; Grieved with the present, of the past ashamed; They live and are despised, they die, no more are named.'

Do you want me to give you incentives to study? I know not where to begin. All nature is ladened with them. Do you wish to excel? Study. Do you wish the gracious smile and kind approbation of your parents? Study. Do you wish to be respected and esteemed by all? Study. Do you wish the means of obtaining wealth? Study. Do you wish to advance society and preserve liberty? Study. Do you wish to pry into and enjoy the beauty and sublimity of nature? Study. Do you wish to lay up an inexhaustible store of contentment and happiness for afflicted old age? Study. Go it while you are young, and when you get old you can come it, not go it at gambling, horse-racing and other dissolute habits, but go it at study; dive into the deep education, out go it at study; dive into the deep many obstacles and evils that beset your way, and to give and exhaustless recesses of literature and science, and when you get old you can come at contentment and happiness .-The long and weary hours of old age and debility may be cheered and lightened by the beauty of science, the melody of song and the tale of gone by ages, all of which are forever beyond the reach of the ignorant,

Learning is the mother of civilization, the mutual guardian of civil liberty and the strenuous promoter of christian morality. These are the three great requisities that are absolutely necessary to make a nation of people prosperous and happy. Without learning neither one can exist in simplicity and purity; education then is the greatest blessing that a people can possess, other things being equal. To demonstrate the truth of these assertions, you must needs follow me into the dark and oftentimes doubtful recess of medieval tale; as you travel through the great avenue of history, from the downfall of Roman magnificence and splendor, to the revival of learning and the consequent reformation of the christian religion in its purity, you pass through an unbroken night of ignorance, oppression and superstition for nearly five centuries, after which, here and there by the way side you discover a faint glimmer of light from the midnight lamp of some votary to literature and science : as you farther proceed those luminaries become more constant and more distinctly discernable, nearly to approach us, and in a few more centuries the day begins to appear over the eastern horizon, the dusty volumes of Grecian and Roman literature are rescued from the gloomy archives of Constantinople and disseminated over Western Europe to tell to a world of supine ignorance the tale of ancient magnificence, and shed upon the world a flood of light which has redounded

to the prosperity and happiness of all christendom. But let us return to the history of learning in the prior pe riod of the dark ages, and search out the obstacles that prevented the advance of civilization, and kept the mind of man so long benumbed by ignorance and superstition. All history tells us that it was the Feudal system and the Papal power. One would naturally suppose, after the destruction f Rome, (which had long been enfeebled and declining, from the tyranny of its emperors and the profligacy of its people, and the consequent establishment of barbarian supremacy.) that the bold, free, and liberal nature of those sturdy northern men would be softened, animated and im proved by the study of the arts and sciences of the Romans which still remained among them for a while, but, instead of those bright anticipations being realized, how sadly dif ferent the picture! The insensible advance of feudal oppression, and the gradual decline of Christian purity into article of the kind ever introduced under the name of superstition and ignorance, and the consequent rise of the Papal influence thereon, present to our view the successive Pulmonic Wafers are counterfeits. The genuine can be encroachments by which tyranny was established, and the known by the name BRYAN being stamped on each WAFER. gradual accessions of shade by which the world was at last enveloped in darkness. It was the studied policy of the great lords and barons, and even of kings and emperors, to keep their subjects in ignorance and darkness, lest the light which shone upon the middle and lower classes would dazzle their own splendor, and check their own despotic sway it was also the constant care of the pious Pope to hold the world in superstition and ignorance, so that he might sit enthroned, and bid the blind and worshipping wor d obey, or suffer the terrible consequences of his ecclesiastical thunder -the interdict and final excommunication, so that he could have an Emperor like Henry IV. of Germany, barefooted and in penance for three days before his palace, beseeching tavor and acceptance. You will all agree with me, that whatever would tend to lessen or remove either of these two great evils by which the world was then possessed, would tend to ameliorate the condition of mankind, and be a blessing to all future generations. Can it be shown that learning was one of the first and bitterest enemies to these institutions? I think it can.

About the close of the eleventh century, Henry the IV of Germany, enfranchised the most important cities of his kingdom, but their inhabitants were not prepared by learning, to take advantage of this immunity; about this time also, the seeds of knowledge had stealthily been sown and were insensibly increasing, (this was not, however, the era of the revival of letters,) still many scholars had emigrated from the east, and were every day imparting wisdom into the minds of enthusiastic deciples; but those schools were so scattering that their effects were not yet noticed, until about a century and-a-half afterwards, knowledge told those people that there was a great deal to be made out of their munity; they leagued together in what is known by the league of the Rhine and the Hanseatic league, for the estabishment of a system of commercial intercourse between the eastern and western divisions of mankind; this league continued for three hundred years to distribute the labors of art and the gifts of nature wherever it touched, until its destiny was accomplished and it was finally superceded on the iscovery of the East Indies by a more complete though still mperfect system, which has so long continued to soften and prove the condition of man.

As the fortunes of the Greek empire declined, the inter-

ourse between Constantinople and Western Europe had ong continued to add to the progress of the latter As early as the thirteenth century, the splendor of Greek learning and philosophy had illuminated the prime points of the kingdom of Western Europ :- as the inhuman Turks thickened around the walls of their dying prey. (Constantinople,) scholars every day made their escape from the terror of their arms | aged 4 mos. and 10 days. into the West, and were there sowing the seeds of knowledge and opening the eyes of the prople, that they might more warmly receive and more cordially embrace the god of literature and science, when he should be driven from his abode in Constantinople by the ruthless Turk. Education, about the fourteenth and firteenth centuries, had set the mind of man to thinking, and hereupon we denote the era of inventions and discoveries, especially of the art of turning inen into paper, the printing press and many others, the nportance of which is sufficiently obvious to all; but what did the making of paper and the printing press do? It Satchwell. brought forth from their dusty and comparatively useless archives, the writings of sage philosophers, splendid theorists, admirable historians, and greatest of all, it entered with pious step the sacred repositories of the Holy Scrip tures, and published all to an amazed and astonished world of superstition and comparative ignorance; and this was the fatal blow to the Papal power, which had grown to en- of William L. Moore, that CHARLES, a slave of light comormous proportions; it was destined to bring about a religious inquiry, which was to overthrow the authority of the Pope, and establish on its ruins pure and undefiled christianity, emenating from faith in the Son of God, instead of the perhaps on his way towards Pittsboro', and will probably dissolute and exacting Pope; this placed Christ at the head stop in Brunswick and Bladen Counties on his way thither. he not able to complete your educational course by going becomege, don't descair, but recollect that the mind goes of the Church, instead of the wicked, imperfect and tyrannical | These, therefore, are to command the said Charles, in the throm hint to hint, and that you can, after a little start, Pope of Rome, this was the fruits of the seed sown by knowlwith perseverance and exertion, gain for yourselves what edge-this was the repository of intellectual culture over igof desire a complete education. Then, push on as far as norance and superstition-this was the power of light over darkness. On the revival of learning, great efforts were made, on the part of rulers and those in authority, to supussible while the opportunity attends you. Every hour of alease study enlarges and multiplies the senses of the mind press it, but it rose like a giant in the strong arm of the ately surrender himself as aforesaid, it shall and may be makes broader and plainer the range of vision. Don't peasant, and set a world of kings and nobles at defiance. Let me now in conclusion entreat all who are not interest- accusation or impeachment of any crime whatsoever. ed in the cause of learning, to come in penance to its shrine, to bow their stubborn minds to its enlightening influence, and to push onward the car of civilization, with whatever occasion on which they were uttered, still I do deny it power they can wield. If you are too old to begin now, or it circumstances of life disable you, send your children, and teach them before they go, and while they are going, the tender, because we all know that there are some persons power and importance of what they are about receiving. It is advancing your own social and political interest, for it improves the state of society in every particular -- it purifies the government, and therefore improves the state of every individual who is a member of that society, or subject of that * me, to drink deep whenever the opportunity presents it- government. By giving to the people the means of detectsell-not of wines, but of learning. REVIEW OF THE WILMINGTON MARKET. FOR THE WEEK ENDING JULY 25TH, 1860.

Since our review of Wednesday last the arrivals of country roduce have been exceedingly light, not withstanding which the market has ruled inactive, and prices of the leading articles have further declined. Both branches of the Cape Fear river continue at a very low stage, and consequently but little produce has reached here from above tide-way .-Below will be found a review of the week's transactions: TURPENTINE -- There has been no activity in the market for this article since the close of our last review. The market ruled quiet in the earlier part of the week, and former quotations were maintained up to the close of Saturday's transactions; on Monday, however, there was no disposition on the part of buyers to operate unless at a decline. which was submitted to, and sales were made at \$2 30 for virgin and yellow dip, and \$1 15 for hard, per bbl. of 2×0 The market has since ruled steady, and all received has sold at above figures. We notice only light receipts,

and quote sales for the week of 3,611 bbls., as follows: Virgin. Yel. Dip. Wednesday.. 150.....\$2 40......\$2 40.....\$1 20 725...... 2 40....... 2 40...... 512...... 2 40 2 40 1 20 Friday 249. 2 40. 2 40. Saturday Monday.... 800..... 2 30 2 30..... 1 675...... 2 30 2 30...... Tuesday,

Wednesday 500 2 30 2 30 1 15
SPIRITS TURPENTINE.—The advices received since our last have continued unfavorable for this article, and prices are one cent lower than quoted on Wednesday last-the market closing quiet on yesterday at 34h cents for country Wednesday, 20 bbls. at 354 cents per gallon Thursday,.. 295 " " 35"

Friday 155 " " 35 Saturday, . . 100 " " 35 Monday,... 238 " " 37 Do..... 128 " " 35 40 ** ** 341 250 " " 343 Tuesday, ... 200 " " 35

Rosin -During the week just ended the market has ruled unusually quiet for all grades, and but very little has been

done in the way of sales. The receipts for a few weeks past have been meagre, and in consequence the stock in receiverhands has become materially reduced; there is, however. but little demand from buyers, and sales are exceedingly difficult to effect unless at a decline on former quotations .-Sales on Wednesday last of 475 bbls. Pale at \$2 75 to \$3 25 per 280 lbs., according to quality; Thursday 1000 do. Common at \$1 121 per 310 lbs.; Monday 75 do. No. 2 at \$1 20 per bbl.; 170 do. inferior Pale at \$2 to \$2 25 per 280 lbs.; and 2760 do. Common at \$1 10 per 310 lbs.; Tuesday, 108 do. No. 1 at \$2, and 600 do. Common at \$1 10 per 310 lbs .the market closing quiet, with a declining tendency for all TAR-Is in moderate demand, and scarcely any coming to

market. The receipts for the week comprise only 60 bbls. which were taken at \$1 80 per bbl. BEEF CATTLE AND SHEEP-The arrivals of beeves for few weeks past have been meagre, being confined to two or three small droves, and the stock in butchers hands has become pretty much worked off. A fair demand exists, and parcels would find ready sale at 51 to 7 cents per lb., according to quality. Sheep are also brought in sparingly, and are wanted for butchering purposes. We quote at pr ces ranging from \$1 50 to \$4 25 each.

BARBELS-In the market for empty Spirits Turpen ne barrels we have no change to report so far as regards prices. A moderate demand exists for prime quality second hand, very few of which are on market, the bulk being of inferior quality. We quote second hand at \$1 30 to \$1 40 for lots as theyrun, and \$1 80 to \$1 85 for sected. New York make meet with ready sale at \$2 10 a \$2 15, as in quality. COTTON-No sales reported during the past week. We are anable to give a correct quotation of the market, and therefore omit unstations in table.

COFFEE-Under the advices from abroad the market here

exhibits more firmness, and the price of Rio has an upward WE HAVE ON EXHIBITION the largest, most attractive and most inviting assortment of goods in the Trunk line that can be found in the State. We call particular attention to our latest styles of LADIES' TRUNKS which we have a struck of the stock of the st enquiry for retailing purposes. The sales for the week have been confined to small lots from the granaries at 95 cents to I per bushel, as in quantity. FEATAERS—Scarcely any arriving, and the market is poorly supplied. In moderate demand at 45 to 50 cents per lb.

FLOUR—Since our review of Wednesday last there has been little or no disposition on the part of buyers to oper-

ate, and in consequence the market has ruled quiet for Ftate brands. The receipts for the week have been better, and the stock in first hands has become increased and is fully ample for present wants. We quote sales of only two or three small parcels from wharf at \$7 25 for superfine, and \$7 50 per bbl. for family-the market closing with a declining tendency.

GUANO-There is a fair supply of nearly all descriptions in dealers' hands, and only a small business doing at present. We quote from store as follows : No. 1 Peruvian \$60; Reese's manipulated \$52; American \$40; Sombrero \$35; Super-Phosphate of Lime \$50, and Land Plas er \$10 per ton, in lots of one ton and upwards

GRAIN-In the market for Corn we have nothing new to report. None has arrived since the close of our last review and therefore no sales have taken place except in the small way from store. At present there is a fair stock of former receipts in t'e hands of dealers, and the e is little or no en- the use of Wood's Har Bestorative, and requesting my cerquiry except for prime quality, a few cargoes of which wou'd find purchasers at a fair price In the absence of I award it to you cheerfully, because I think it due. My sales we q ote nominally at 75 to 0 cents per bu-hel, according to quality .- Oars-The market remains about the *ame as last reported. There is a moderate supply in store, and only a retail business doing. We quote cargo price at sensibility and dandruff to form upon it. Each of these diset for all descriptions, and prices have decl ned a shade .-There is a fair stock of Cow in dealers' hands, and at pres- of my head and threatening to make me bald. ent only a retail demand exists. No sales reported, and we quote nominally at 75 to 80 cents per bushel - Rice - Wood's Hair Restorative, mainly to arrest the falli g off o rules firm at former quotations. We quote a moderate de- ever be restored to its original color except from dyes. mand from the trade, with sales at 41 to 42 cents per lb., according to quality.

do not appear disposed to operate unless at lower figures. was induced to try it. A lot of 81 bales Northern was received in the early part of receipts of Eastern; last sale was at \$1 25. LIME-Merely a retail demand exists, and the stock in

dealers hands is fully adequate for present wants We quote To O. J. Wood & Co., 444 Broadway, New York. at \$1 to \$1 10 for common lump, and \$1 35 per cask for white, in quantities to suit. Molasses-No late receipts, but we notice a moderate

supply of former arrivals on market. There is only a light demand, and the sales have been confined to small lots of Cuba from first hands at 24 a 26 cents per gallon in hhds. POTATOES-But few Irish are now brought in, and we no tice a moderate demand. We quote from carts at 90 cents to \$1 per bushel.

Provisions .- In the market for N. C. cured Bacon we notice a decidedly better feeling since our last, and prices have advanced a shade. The quantity received for some weeks past has been unusually light for the season, and there is very little if any remaining in first hands. There is South. I see several of your certificates in the Mobile Mer a brisk demand from 'dealers, but owing to the meagre ar- | cury, a strong couthern paper. rivals we have to report sales during the week of only 2 a 3000 lbs at 13 a 134 cents for hog round, and 144 cents per dency to prevent transactions. We quote small sales from the afflicted such a treasure. in bbls. Western make is also scarce, and sells at 131 to 14 cent. more in proportion, and retails for \$3 a bottle.

Cents - Pork. There is only a light stock of Northern O. J. WOOD & CO., Proprietors. 444 Breadway, New on market, and prices rule high; there is, however, merely | York, and 114 Market St., St. Louis, Mo. a retail demand at present. See table for store quotations SALT-The receipts of Liverpool ground have been small | DEALERS. for some time past, and in consequence the stock on market has become very much reduced, and is barely sufficient for present wants. There is a fair enquiry from buyers, and a few lots would sell readily. We suote nominally at 95

111 cents a \$1 per sack as cargo price. Shingles-There continues to be a fair demand for shipping, and none of consequence coming to market. The receipts have been confined to small boat loads of Common, which have sold at \$3 a \$3 25 per M. TIMBER-In the market for this article we have no change

worthy of report to make. There is a moderate demand for prime quality, but owing to the low stage of the water courses, little or none can reach market. We quote sales of only two or three rafts at \$5 25 a \$6 50, and one lot per rail-FREIGHTS - The arrivals of country produce have been juite small for a few weeks, owing mainly to the low stage of the river, and in consequence the mark t has ruled dull ;

we have, however, no change to make in coastwise rates, and refer to our table for last prices paid There are plenty of vessels now in port, and considerable difficulty is experienced in obtaining cargoes of naval stores. CHARLOTTE, July 23 -- Cotton -- None in market; Wheat, \$1 15 a 1 30 per bushel; Flour, \$2 75 for Fine, \$3

for Superfine, and \$3 50 per sack of 98 lbs.; \$6 a 7 per bbl. cooperage, &c.; say on lumber 90 cents to \$1 \$ M .; Tar and Corn, 92 a 95c. per bushei; Bacon, 12 a 124c. per lb; Lard CBARLESON, July 23 - Semi-Weekly R port.-Cotton. -The market for the past three busines days has been very quiet, the transactions having been limited to 200 bales, at

> BALTIMORE, July 23 .- Flour is steady and quiet; Howard Street and Ohio \$5 25. Wheat has closed steady; sales of 20,000 bushels red at \$1 20 a 1 27, white \$1 30 a 1 55 -Corn is dull and heavy; mixed 62 cents, yellow 63 a 64c.. white 65 a 70c. Prov sions are firm; Bacon Sides 12c.; Mess Pork \$20, Prime 15, Rump 14 Whiskey 21 cts. SALISBURY, July 24 - Bacon 10 a 114; Beeswax 20 a 25; Coffee. Rio, 124 a 16; Java 17 a 222; Cotton 9 a 10; Cotton Yarn 0 90 a \$1 00; Corn 75 a 80; do eal 75 a 80; Feath

ers per lb. 30 a 35 : Flour per bbl. 5 80 a \$6 09; per 100 lb 2 80 a \$3 00; Lard 12 a 12a; Pork 7a a 8; Molasses, Cuba 34 a 45; New orleans 60 a 65; Muscovado 45 a 50; Oats 40 a 45; Potatoes, Irish, 50 a 80; Sweet 40 a 50; Rags pe 1b 24; Salt per sack 1 8a a \$1 90; Sheeting, brown 9 a 10 ugar, brown, 7 a 10; Loaf 12 a 15; Clarifi d 11 a 12; Tal.ow, 10 a12; Wheat white 1 25a\$i 30; red 1 10a1 25, Wool, NEW YOKK, July 23 - Cotton is steady; uplands and

midding 104. Flour is lower; Southern \$5 85 a 5 75 -Wheat has declined I a 3 c s. Corn is he vy. Mess pork \$18 50 a 19 50. Whiskey 21 cts Sugar is held higher. r A 1 ETTEVILLE, July 23.—Bacon $11\frac{1}{2}$ og $13\frac{1}{2}$. Gottonsir to Good. $10\frac{3}{2}$ @ $10\frac{2}{4}$; Ordin. to Mid. 8 @ $8\frac{1}{4}$: Flour-Family, 6 75 @ 16 85; Super. 6 50 @ \$6 60; Fine, 6 25 @ 35 , scratched, 6 00 @ \$6 10 : Grain-Corn, \$1 10 @ 1 17. HOW LOST, HOW RESTORED. Just Published, in a Seared Envelope, A LECTURE ON THE NATURE, TREAT MENT AND RADICAL CURE OF SPER-MATOREHCEA, or Seminal Weakness, Sex-nat Debitty, Nervousness and Involuntary Emissions, producing Impotency Consumption and Mental and Physical

By ROB. J. CULVERWELL, M. D., The important fact that the awful consequences of self abuse may be effectually removed without internal medicines or the dangerous applications of caustics, instruments, medicated bongies, and other empirical devices, is here clearly demonstrated, and the entirely new and highly successful treatment, as adopted by the celebrated author fully explained, by means of which every one is enabled to cure himself perfectly, and at the least possible cost, thereby avoiding all the advertised no-trums of the day. This lecture will prove a boon to thousands an I thousands. Sent nuder seal to any address, post paid, on the receip of two postage stamps, by addressing Dr. CH. J C KLINE. M. D., 480 First Avenue, New York, Post Box 4586.
